

# Are you a Research Software Engineer?

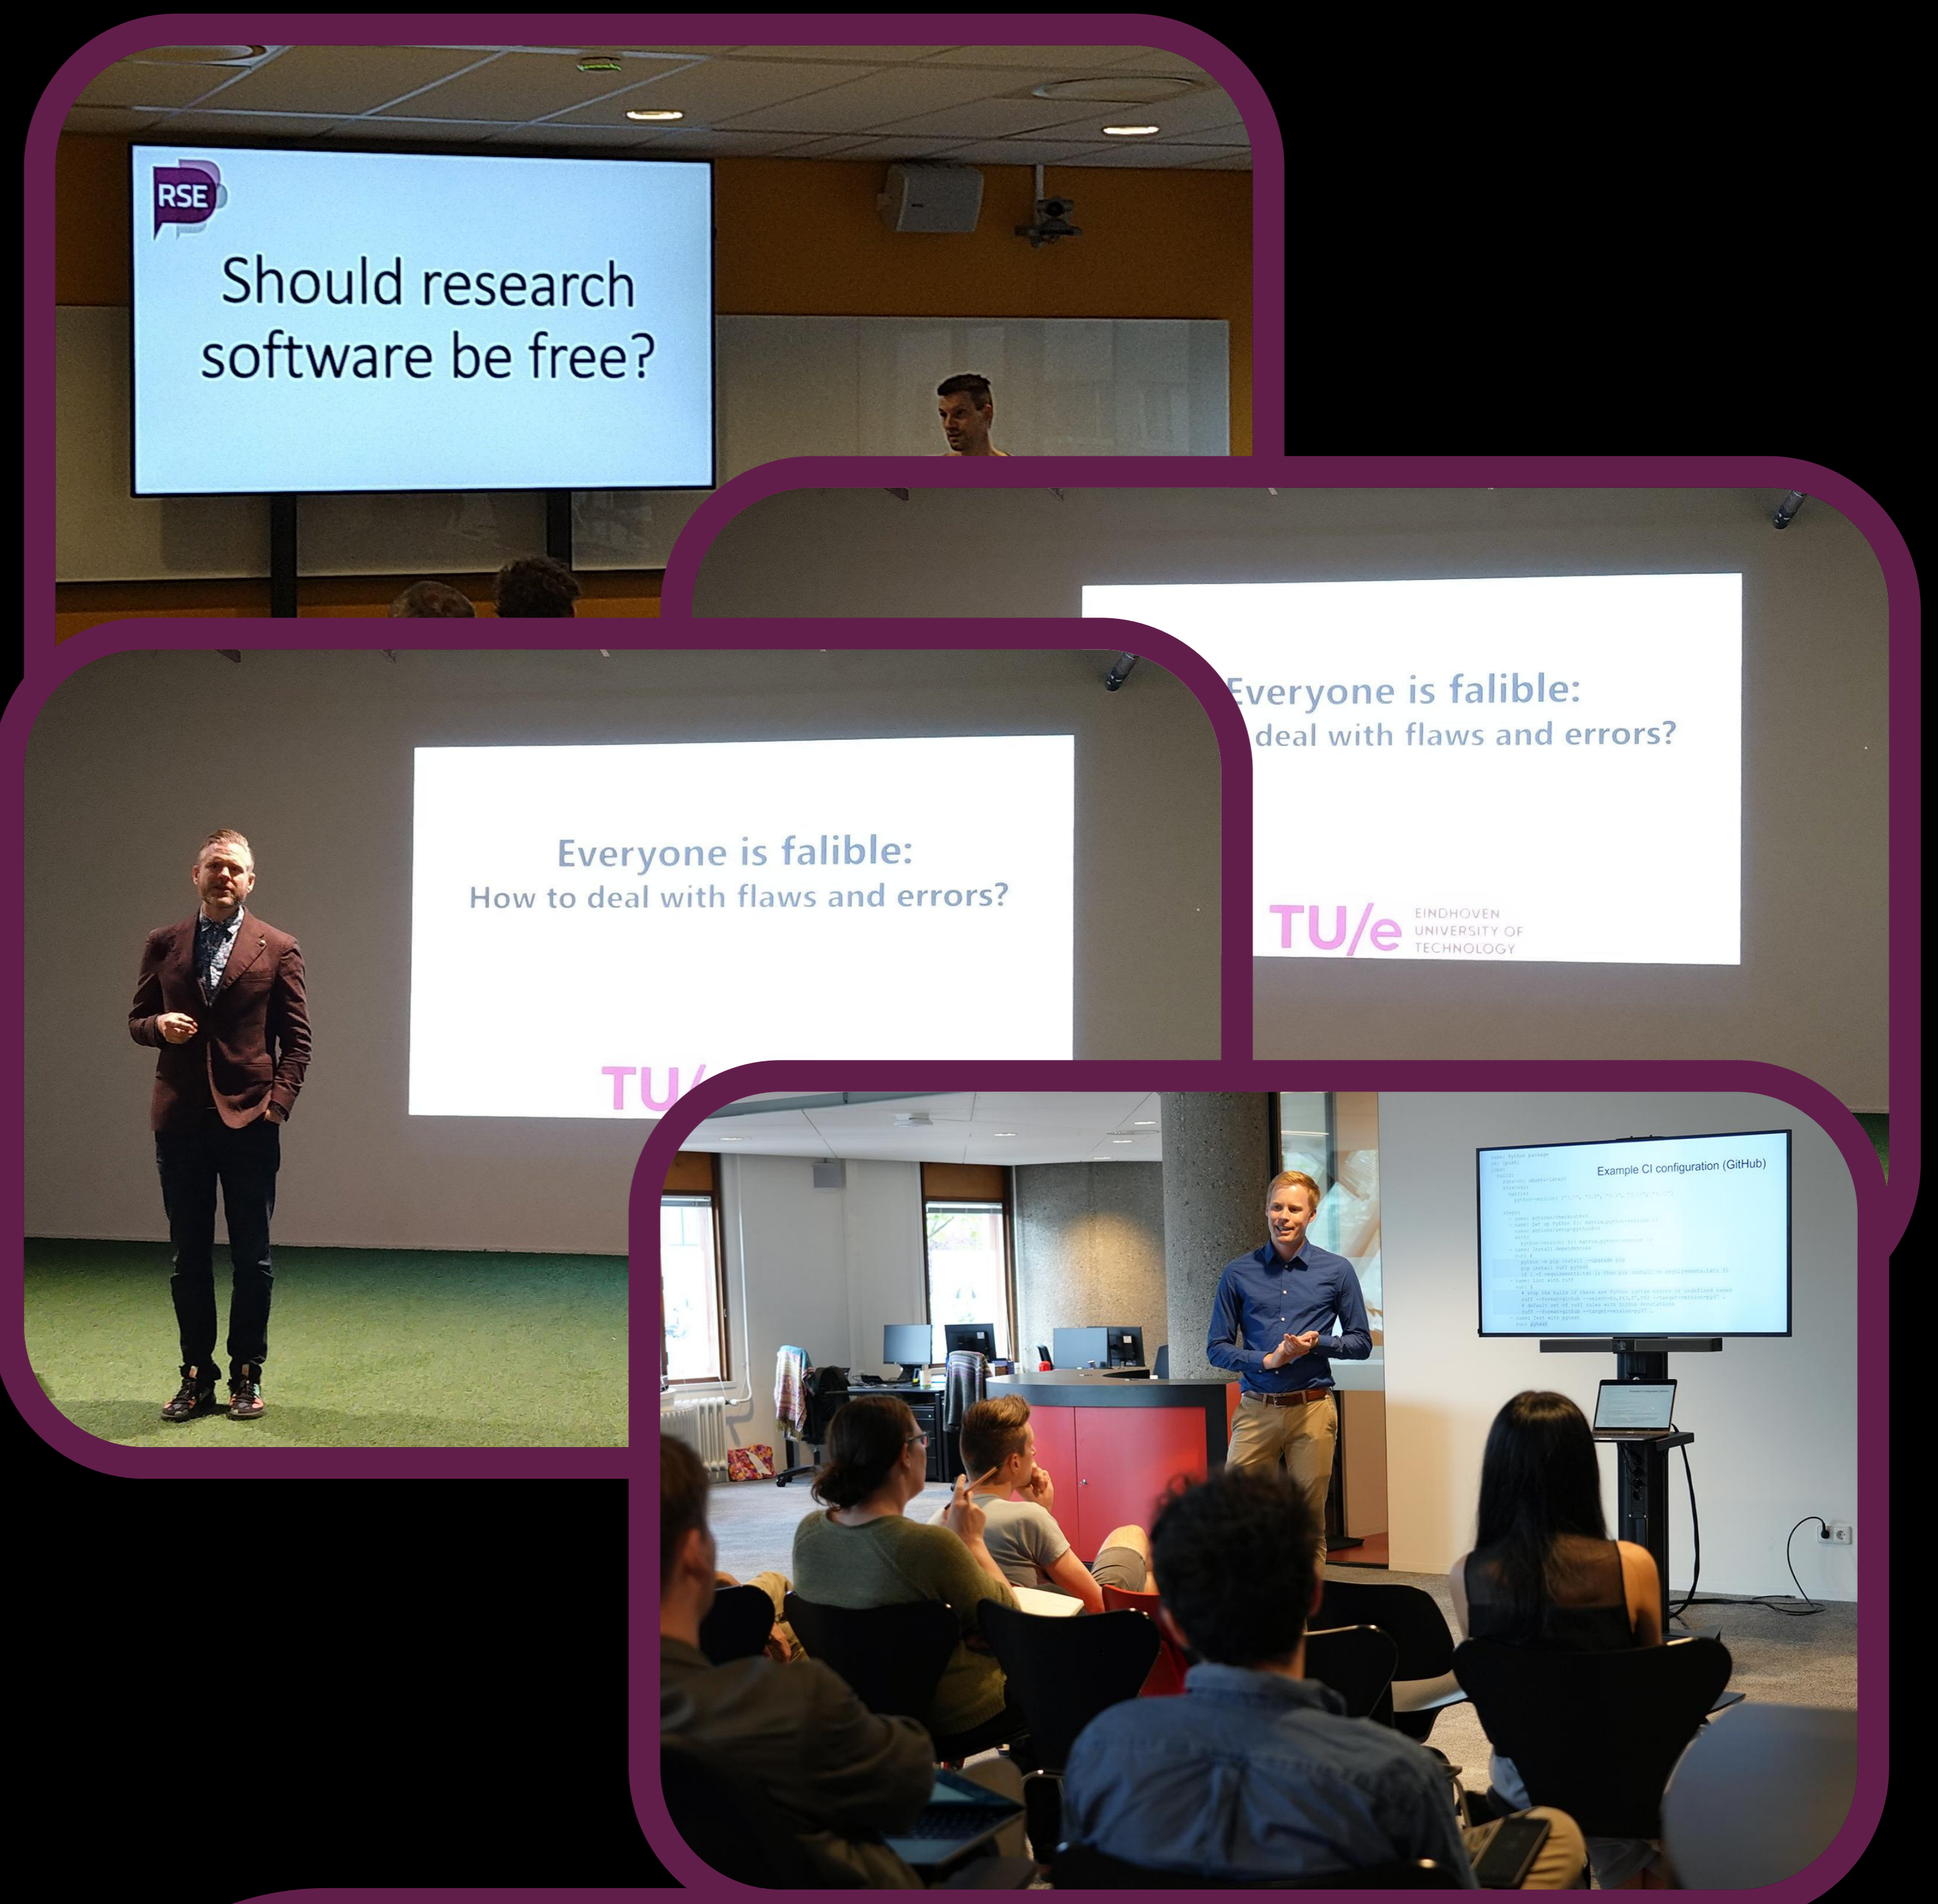

Join NL-RSE – the Dutch network of Research Software Engineers

## What is NL-RSE?

NL-RSE is the community of Research Software Engineers, or RSEs, from Dutch universities, knowledge institutes, companies and other relevant organisations. We promote sharing knowledge between RSEs and raising awareness about the importance of research software and the people who develop it. We also connect to the growing RSE community around the globe, such as the RSE associations in Germany, UK, USA, Australia and Asia.

## Meetup topics 2023

- **Spring 2024: Why rust? Why now?**
- **23 Nov: Professionalisation for RSEs**
- 15 Jun: Introduction to Automated software testing
- 19 Apr: Bugs in research data and software

## What do we do?

What do we do?  
We organise meetups for knowledge exchange and networking, ranging from technical to policy oriented topics.

Anyone who self-identifies as an RSE can join the community!
